

Frontiers of Large Igneous Province Research

RICHARD ERNST
Carleton University

Monday, March 27th

3:10pm held at

Berry Center Auditorium

<https://uwyo.zoom.us/j/3072232292>

Reception will follow talk
– held in the ESB-Atrium

Dr Richard Ernst is at Carleton University, Ottawa, Canada, and his research focusses on all aspects of Large Igneous Provinces (LIPs).

“This lecture provides an overview of current research frontiers on all aspects of Large Igneous Provinces (LIPs), including their dramatic flood basalts and plumbing system of dykes, sill and layered intrusions, supercontinent breakup, catastrophic environmental/climate change including mass extinction events, links with mineral, metal and hydrocarbon resource exploration, and planetary analogues.”
